

ENVIRONMENTAL POLICY

PIROLLO DANILO is an Italian company capable of carrying out precision machining, characterized by a very high degree of customization in compliance with the times required by the customer. PIROLLO DANILO is the result of 35 years of experience in the sector, which undertakes to pass on to its collaborators the secrets and knowledge acquired over time.

The policy of continuous reinvestment in the company has strengthened the company foundations, making the manufacturing and transformation process of materials competitive and innovative.

In this context, PIROLLO DANILO is seriously committed to working to contain and reduce the environmental impact of its activities, with the aim of providing the customer and the market with products whose quality is also synonymous with respect and responsibility towards the environmental good .

For this reason, PIROLLO DANILO has adopted an Environmental Management System in compliance with the UNI EN ISO 14001 standard; this system is applied in particular to improve the environmental performance of the company in its production of precision mechanics.

This Environmental Policy therefore defines the company's attention to the environment, which takes the form of the implementation of specific programs for the prevention of pollution and the improvement of everything concerning the environmental impact.

Our commitment is primarily aimed at:

- to maintain the environmental organizational structure over time, in order to consider environmental protection as an integral part of the corporate decision-making process;
 - absolute compliance with all the legal provisions in force relating to environmental protection, and with the other provisions that the organization subscribes to, concerning its own environmental aspects;
 - to raise awareness and train personnel on environmental matters, promoting "environmentally" responsible behaviour;
- attention to communication, informing personnel, customers and suppliers of its environmental objectives and the progress achieved;
- monitor the consumption of energy resources and raw materials, and their environmental impacts;
 - to collaborate with suppliers who are attentive to the impact on the environment deriving from their activities;
 - control of possible emergency situations, and management according to specific procedures and planned intervention plans;
 - to perform internal audits to check its environmental performance.
